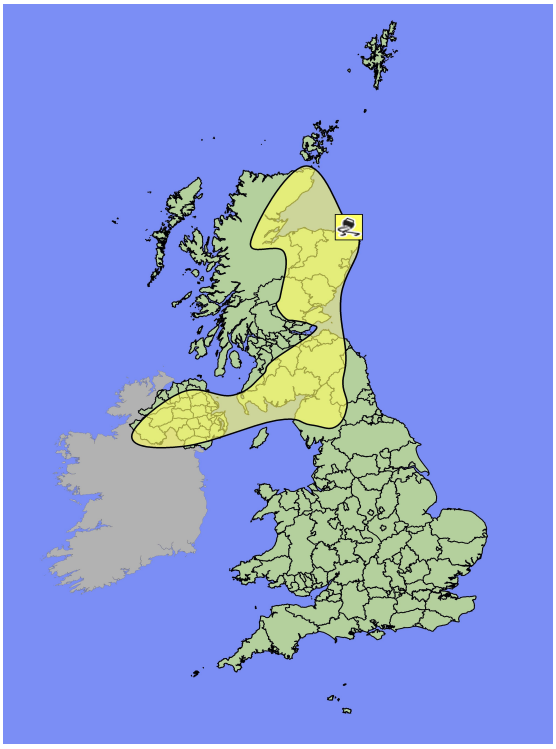
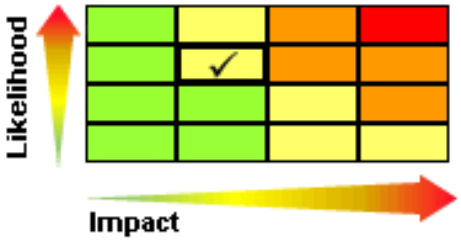
National Severe Weather Warning Service





Chief Forecasters Assessment
After mild conditions to start New Year's Eve, colder air has spread south. Temperatures on surfaces have dropped quite quickly this evening, despite scattered quite heavy showers, and this process will allow icy patches to form during the rest of the night.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **23:20 on Mon, 31st Dec 2012** until **10:00 on Tue, 01st Jan 2013**

Icy patches will form where roads and pavements remain damp tonight. Additionally some showers of rain, sleet and hill snow will occur, especially across western parts. The public should be aware of the risk of slippery conditions on roads and pavements.

This warning has been updated to include parts of Northern Ireland and Northern England.
